# SAVING PLOTS

```
ggsave("file.png", width = val, height = val,  
        units = c("in", "mm", "cm"), dpi = val)
```

A generic set-up for 800pt by 600pt output:

```
> ggsave("examplePlot.png", width = 282,  
        height = 211, units = "mm", dpi = 500)
```

Will save the last plot you created!
